

ENGINEERING DIRECTOR

TMI is seeking an experienced Engineering Director to lead our growing engineering department. This position is located in Holly, MI and is responsible for the Mechanical Systems Division for MiTek Industries. This position reports to the CEO.

Position Summary: Plan, direct, supervise and utilize functional authority to organize, coordinate, integrate and complete all product and process related activities in the engineering department and any other areas of assigned responsibility. Engage in establishing strategic direction and effective operation of the engineering department in order to support the overall goals of the company.

Qualifications:

- A four-year degree in engineering is required.
- Minimum of ten years' related experience managing engineers in design and manufacturing environments is required. Industry (mechanical/HVAC) experience is strongly preferred.
- Strong written and verbal communication skills; customer interaction skills; solid organizational skills; and the ability to quickly prioritize and multitask in a fast-paced environment.
- Strong computer skills including MS Office Suite, Outlook or similar. Familiarity with Solidworks, Autodesk, CAD-MEP and/or Revit is preferred.

Office Hours and Travel Required:

Full-time, M-F 8am-5pm or 7a-4p, 5% travel
