Hydronics Engineer

TMI is seeking an experienced Hydronics Engineer to work on our mechanical systems design team. This position is located in Holly, MI and reports into our Engineering Department.

Position Summary:

Perform engineering duties in planning and designing custom mechanical systems including boiler, chiller, HVAC and refrigeration systems. Support the manufacture of such equipment as centralized heat, gas, water, and steam systems.

Qualifications:

- A minimum of a Bachelor's degree in HVAC/mechanical engineering or equivalent experience is required.
- 3-5 years' experience designing industrial custom HVAC/R and mechanical systems is required.
- Excellent written and verbal communication skills; customer interaction skills; solid organizational skills; and the ability to quickly prioritize and multitask in a fast-paced environment.
- Strong computer skills including MS Office Suite, Outlook or similar. Experience using Autocad and/or 3D modeling/design software is strongly preferred.

Office Hours and Travel Required:

Full-time, M-F 8am-5pm or 7a-4p, limited travel (less than 10%)

Application for Position:

Qualified applicants only please apply at the following link:
